Education

University of Toronto May 2026
HBSc Computer Science Specialist *Mississauga, Canada*

Awards
UTM Entrance Scholarship - Merit based scholarship for students with distinguished academic record

Experience

Software Developer Intern May 2024 – May 2025
SOTI *Mississauga, Ontario*

- Spearheaded UI revamp of SOTI Snap in React/Angular/TypeScript, shipping **20+ components** and reducing average task clicks from 6→3 based on product telemetry.
- Revamped announcements service in **C#/.NET**, adding scheduled sends and bulk Excel import; **cut manual entry time by 40%** and eliminated recurring timeouts in peak hours.
- Delivered **10+ customer-specific apps** with SOTI Snap, Blockly, JavaScript, and REST APIs, achieving **95% satisfaction**.

Teaching Assistant January 2024 – May 2024
University of Toronto *Mississauga, Ontario*

- Provided technical mentorship for multiple full stack projects over a 4-month scrum development cycle.
- Taught design patterns, code architecture, Git, OOP, React, MongoDB, Neo4j, and PostgreSQL to classes averaging **50+ students**.
- Marked assignments for **240+ students**.

Projects

Exam Jam | *React, Typescript, Express.js, Node.js, MongoDB, Material-UI*

- Built a web-based educational platform that prioritizes social networking and community engagement to facilitate Exam preparation.
- Developed an intuitive and user-friendly interface using **React**, providing students with an efficient and accessible way to access the platform and study materials.
- Created various **RESTful API endpoints** to enable data retrieval from the database, and to facilitate creation of posts and comments.
- Utilized **Docker** to containerize the front-end and back-end of the platform, ensuring a consistent and efficient deployment process

Easy Chef | *React, Javascript, Python, Django, HTML/CSS*

- Developed a recipe sharing platform, allowing users to create, share, and discover recipes.
- Utilized **Django** to create a scalable and maintainable back-end, with **SQLite** as the database for efficient data storage and retrieval.
- Built a responsive user interface using **React, HTML, CSS, and JavaScript**, providing users with a smooth and engaging experience when browsing, searching, and creating recipes.
- Utilized **React's** component-based architecture to create reusable and modular UI components, reducing redundancy and improving code maintainability.
- Implemented **RESTful APIs** using **Django to facilitate creation of recipes and networking features**

Vibin | *Java, Spring Boot, Hugging Face, Supabase, Spotify API, AWS*, Docker

- Integrated a **Hugging Face sentiment-analysis model**, fine-tuned on over 1,500 sample entries, to automatically classify user mood in under **150 ms per entry.**
- Hooked into **Spotify's Web API** to fetch and display five personalized song recommendations per journal entry, leveraging **metadata filtering and lazy loading** to keep initial page weight under **80 KB.**

Technical Skills

Languages: Java, C#, Python, SQL, JavaScript, C, Typescript
Technologies/Frameworks: AWS, Angular, React, Node.js, NET, Django, Express.js, Next.js, Bootstrap
Developer Tools: Jira, GitHub, Git, VS Code, Linux, Bash, JetBrains, Unit Testing, Scrum
